Experienced Extrusion Tooling Manufacturing
For Fast Project Turn Around

MANUFACTURING

Barbour Plastics operates out of two manufacturing locations: our headquarters in Brockton, MA with 127,000 sq. ft., and our Atlanta, GA plant with 60,000 sq. feet. With 28 extrusions lines of all sizes and configurations we have the capability to produce small simple profiles to large and sophisticated shapes. We process many thermoplastic materials such as PVC, TPV, TPE, POLYCARBONATE, ABS, LDPE, HDPE, POLYPROPYLENE.
